...Simple Answers

Lets talk...

# **TekWorks** ...Video Conferencing

**Video conferencing** (or telepresence) is designed to emulate a face-to-face meeting experience through effective use of technological resources.

## Rewards of VC....

**Team Building:** Video conferencing allows remote teammates to see each other as often as if they were in the same office, building camaraderie without the associated stresses of business travel.

**Real-time Collaboration:** Organizations can deal with large amounts of rich data and collaborate from multiple locations in real time, with the visual and multi-media capabilities of video conferencing.

**Cost Savings:** Your organization will be able to reduce travel expenses such as fuel, airfare, hotels, restaurant charges and cab fare.

**Carbon Footprint Reduction:** Video conferencing allows you to dramatically reduce CO2 emissions caused by automobiles and airplanes.

Consider this: Companies, on average, by using video conferencing:

- > Save 30% on travel costs
- > Reduce time-to-market by 24%
- > Reduce downtime by 27%
- > Save 25% on training
- > Shrink recruitment times by 19%
- > Reduce sales-related costs by 24%
